Cost Estimates

Prepared for

City of Reno via
Nevada Department of Transportation

Agreement No. P206-99-015

January 23, 2001

The estimate of construction costs presented above is based upon preliminary engineering plans prepared for the project. The plans upon which this estimate is based are incomplete, preliminary and not intended for construction. No general, special or technical specifications have been prepared and, therefore, their impact u project cost cannot be determined. Nolte has relied upon its experience and qualifications in preparing this estimate and the results represent Nolte's best judgm as to the probable construction costs. However, since Nolte has no control over cost or the price of labor, equipment or materials, or over the contractor's method of pricing, such opinions of probable construction costs do not constitute representatio warranties or guarantees of the accuracy of such opinions. This opinion of costs sh not be construed so as to impose any liability on the Nolte team should construction costs substantially exceed the Nolte team estimate. The final cost of the project sha be determined through the tendering and construction process.
