

MAYOR'S-McALINDEN PARK UPDATE (3/20/19)

City Council approved the master plan to renovate Mayor's and Dorothy McAlinden Parks on September 12, 2018, and then approved a consulting agreement for preparation of construction plans for Phase I improvements on January 9, 2019. Wet and snowy weather had prevented our consultant from performing additional on-site analysis including updating topographic data and soil sampling until recently.

We anticipate that Phase I improvements will include improved access, parking and drainage to the Mayor's Park fields as well as installation of a restroom building. We also hope to include renovations to the Babe Ruth field with Phase I.

The design process normally takes about six months to get plans ready to submit for building permits. We hope to secure our building permit by October 2019 and advertise for bids at that time. Construction will begin early in 2020 and take approximately 6 months, weather permitting. The earliest the park will open is likely to be late summer 2020.
