

# COVID-19

## CORONAVIRUS

**PROTECT YOURSELF AND HELP PREVENT THE SPREAD**

### WHAT IS CORONAVIRUS COVID-19?

A respiratory illness that can spread from person-to-person; first detected in Wuhan, China, but has now spread to most countries in the world

### WHAT ARE SEVERE COMPLICATIONS?

Some patients have pneumonia, multi-organ failure and in some cases death

### SYMPTOMS

Symptoms appear 2-14 days after exposure

- Fever (above 100.4° F or 38° C)
- Cough
- Shortness of breath

### IS THERE A VACCINE?

No, so far there is no vaccine

### WHO IS AT HIGHER RISK?

- Older adults (age 60 and older)
- People with medical conditions:
  - Heart disease
  - Lung disease
  - Diabetes
- People who have been in close contact with a person infected with COVID-19
- People who have recently been in an area with increased risk of exposure

### IF YOU SUSPECT INFECTION

- Contact a doctor or healthcare provider immediately
- Stay at home and isolate yourself from others to prevent further infection

### WEAR FACE COVERINGS WHEN OUT IN PUBLIC

### WASH YOUR HANDS

- Wash your hands with soap and warm water for at least 20 seconds
- Use alcohol-based hand sanitizer if soap and water aren't available

### AVOID TOUCHING YOUR FACE

- Avoid touching eyes, nose or mouth with unwashed hands

### COVER COUGHS AND SNEEZES

- Cover your cough with a tissue or use the inside of your elbow
- Throw used tissues in the trash
- Immediately wash your hands

### KEEP YOUR DISTANCE

- Avoid close contact with people who are sick (6 feet or 2 meters)

### STAY HOME IF YOU ARE SICK

- If possible, avoid going to work, school, public areas and using public transportation if you are sick

### CLEAN SURFACES DAILY

- Clean and disinfect counters, tabletops, toilets, phones, keyboards and bedside tables
