Residential Fence Permit Guidelines

Surveys are suggested but not required. More information may be required upon submittal.

The following information must be clearly and accurately shown on the plan(s):

- Location and length of fence segments
- Post embedment depth, footing type, and size. (Only if fence is over 6 feet in height).
- Location and width of gates for pedestrian and vehicular access
- Property lines
- Location of existing structures on the parcel
- Fence height
- Fence material
- Location and size of easements (if any) on property
- Adjacent street speed limit
- Adjacent stop signs or yield signs (if any)
- Check with your Home Owners Association (HOA) to determine if a separate approval is required
- Fire hydrants must have a 36" clearance from the back and sides of the hydrant and 8' above
