One map will highlight the public trail which runs through multiple publicly accessible areas of the Caughlin Ranch HOA and the second shows where the dead tree is. The previously attached photos were to show the significant structural defects in the tree that I found while on site.</p> <p>Original complaint: There is a dead tree in the common area of the Caughlin Ranch HOA regularly accessed by HOA members and the general public. I brought this issue to the attention of the HOA Board and administration over two years ago. At the time a City of Reno Fire Inspector visited my property to assist me in addressing my property insurers demand that I remove landscaping from my property. 		<p>upon walking into my backyard was the dead tree just over my fence. They deemed it to be a safety hazard which should removed immediately. They also contacted the HOA General Manager to express their concerns about the tree and the overgrown weeds at the time. As you can see from the attached pictures several large limbs have fallen from this tree over the past few years. This weekend a I spotted young couple with an infant enjoying a picnic under the tree. The general public, elderly neighbors and children frequently spend time near and under this tree during spring, fall and summer.</p>

		<p>and continue to create significant safety hazards and operational disruptions for our utility company.</p> <p>Despite clear local regulations regarding overnight parking, keeping roadways clear, and maintaining unobstructed access, Reno Relo vehicles routinely double-park, block fire exits, and obstruct the entrance and exit to our facility. This has occurred on a regular basis, as documented in the attached photographs.</p> <p>As a utility provider responsible for emergency outage responses, these violations have directly impacted our ability to perform time-critical work. On multiple occasions, our employees have been unable to safely enter or exit our property due to blocked access. This not only delays essential service restoration for the community but also</p>

		<p>creates serious safety risks.</p> <p>Our employees have attempted to resolve this matter amicably by speaking directly and cordially with Reno Relo staff. Unfortunately, these efforts were met with hostility, including staff members screaming at our team, accusing us of trespassing, and telling us to leave their property. This combative response has made constructive dialogue impossible and our employees no longer feel safe addressing this directly with Reno Relo.</p> <p>We respectfully request that the City of Reno investigate these ongoing violations and take appropriate enforcement action to ensure compliance with local ordinances. Safe and clear access to our facility is essential for protecting public safety and maintaining reliable utility service.</p>

SER0128993	Service Request - Yard issues on private propertySER0128993	I am a resident of University Ridge and am writing to report ongoing fire hazard conditions at the above-referenced property that pose a significant risk to our neighborhood. My most urgent concern is the presence of a large dead pine tree on the property. Dead pine trees represent a serious fire hazard, particularly in Nevada's dry climate, due to the highly flammable nature of dry pine needles, resin, and timber. Photographs of this tree will be included for reference. This fire hazard does not exist in isolation but rather reflects a persistent pattern of property neglect since the current owner purchased the property in 2012, including: Multiple large mature trees that have died over the years, apparently due to lack of irrigation and maintenance; establish landscaping that previously made this	5 Redstone Dr, Reno, NV 89512	New	Code Enforcement	2026-05-21 15:58:58
